ALL PURPOSE
DEGREASER

CITRUS DEGREASER IS A SUPER SOLVENT THAT IS 100% BIODEGRADABLE, NON-CORROSIVE, NON-PETROLEUM BASED, WATER SOLUBLE AND FORMULATED FROM ALL NATURAL INGREDIENTS. CITRUS DEGREASER HAS THE GREASE DISSOLVING POWER OF PETROLEUM SOLVENTS WITHOUT THE HAZARDS. CITRUS DEGREASER has many uses. Cold tank cleaner, grease trap cleaner, soap scum remover, odor control agent, rubber cement and spray adhesive removal, laundry additive, engine degreaser, ink removal, oil and grease removal, transmission cleaner, industrial cleaner, parking lot cleaner, decal removing, sewer plant cleaner and degreaser, for cleaning ship and boat bilges, crude oil storage tanks, carpet cleaning additive, tire mark removal and all other heavy duty degreasing where water can be tolerated. Safe to use on all surfaces except some plastics. Test before use.

DIRECTIONS FOR USE:

For normal cleaning, dilute with water before use. When available, use hot water for most effective cleaning. Apply by pressure washer, coarse spray, manually or by other suitable methods. For small areas, apply with a brush. When possible, allow the cleaner to remain on the surface for 1 to 5 minutes then rinse the surface clean with water. For cleaning aircraft parts, truck chassis, buses, tanks and buildings, dilute 1 part CITRUS DEGREASER to 15 parts water. Industrial machinery, garage doors, exhaust tracks and parking lot cleaning, dilute 1 part CITRUS DEGREASER to 5 parts of water. Dip tank cleaning of hard to clean engine and transmission parts, carburetors, brake parts, jet engine burner heads and hydraulic systems use at a 1 to 1 concentration, or for less severe soiling, use at a concentration of 1 to 4. For greatest efficiency when dip tank cleaning, heat the water to 140° F. Rinse with clear water after the soil is loosened. For foam application, dilute CITRUS DEGREASER 1 to 10 and rinse with clear water. Spray on for engine degreasing, dilute 1 to 1 or 1 to 5 and rinse with high pressure water or steam. For all purpose cleaning or degreasing use 1 to 3 ounces per gallon of water. Always adjust the degreaser concentration to rapidly remove all of the soils present, then rinse the surface with clean water.

SPECIFICATIONS:

Appearance.....	Amber liquid
Odor.....	Citrus odor
pH.....	10.5
Specific Gravity.....	0.968
Flash Point.....	113°F
Boiling Point.....	Near 212°F
Water Solubility.....	Complete
